

University/College Name	Course Name	Course Number	Date Taken	Credits Earned	Grade

PHYSICAL CONDITIONING: GEOS 495 requires long days of strenuous hiking (5-8 miles) with significant elevation gain (~1,500ft./day) in order to see the geology and make the observations needed to understand the mapping areas. Your field work will be more enjoyable and productive if you start incorporating frequent physical exercise into your routine activities in the months before the class begins.

DISABILITIES SERVICES: The UAF Office of Disability Services implements the Americans with Disabilities Act (ADA), and insures that our students have equal access to the campus and course materials. UAF is committed to equal opportunity for all students. If you have a documented disability, or if you suspect you have a disability, you must inform us in your application. We can only make appropriate accommodations for your disability if you inform us well in advance. If you have a specific undocumented physical, psychiatric, or learning disability, you will benefit greatly by providing documentation of your disability to Disability SADA), sicut2geology bCe-5(i)5er5(v)r Htri(hi)-4(a4(m) l)-0 0 1tiC8(o)-om(.)-8
