

Bake an Atmosphere Cake

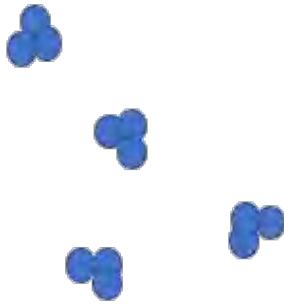

Enjoy baking together and discovering [☺ š Z \[• š! u } • %o Z ☺](#)

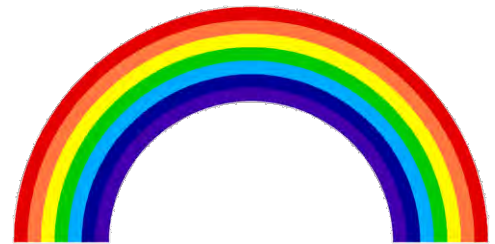

Materials Needed:

Cake base (make or buy)
printed atmosphere

Bake an Atmosphere Cake: Printables

(images are not to scale)

Air to breathe	Aurora	Satellite	Space Station
Airplane	 Ozone	Cloud	The atmosphere protects us from meteorites

What Happens in the Atmosphere?

The Earth has a jacket of gases around it, called the atmosphere

The atmosphere protects us from the sun and keeps Earth warm, and gives us oxygen to breathe. It makes life on Earth possible.

The atmosphere has six different layers. Different processes happen in each layer.
