## 1. Course Information:

Metabolism and Biochemistry, BIOL 4XX (4)

Meeting Times: Tues 9:45 – 11:15 am, Life Sciences

Wed 2:15 – 5:00 pm

Prerequisites: BIOL 3XX, CHEM 195, 199, 201

## 2. Instructing Staff:

Office: 3110 Life Sciences Building  
Phone: 604-275-3232  
Email: [andrew.miller@ubc.ca](mailto:andrew.miller@ubc.ca)  
Mailing Address: Metabolism and Biochemistry  
Department of Biology  
University of British Columbia  
6278 Student Services Building  
Vancouver, BC V6T 1Z2

During the semester, students will work on their

Nov 14 feedback on research reports  
full outline of research report

as seen in the schedule  
chains pair of above In

a. Answers of the lecture slides will be posted just prior to class

- b. A manual for *C elegans* culture in the UAF laboratory will be posted.
- c. Answers to the exam questions will be posted on Blackboard after the exams have been completed and graded.
- d. The course Blackboard Page will contain links to other instructional and informative pages on biochemistry. Some of these will include practice quizzes and short movie clips, which are especially good learning aids.

A copy of this syllabus and the course calendar will be posted separately on Blackboard

guidelines for acceptable and unacceptable behavior.

Honesty is a primary responsibility of you and every other UAF student. The following are common guidelines regarding academic integrity:

1. Students will not collaborate on any quizzes or exams that will contribute to their grade in a course, unless permission is granted by the instructor of the course. Only those materials permitted by the instructor may be used to assist in quizzes and exams.
2. Students will not represent the work of others as their own. A student will attribute the source of information not original with himself or herself (direct quotes or paraphrases) in compositions, theses and other reports.
3. No work submitted for one course may be submitted for credit in another course without the explicit approval of both instructors.

Alleged violations of the Code of Conduct will be reviewed in accordance with procedures specified in regent's policy, university regulations and UAF rules and procedures. For additional information and details about the Student Code of Conduct, contact the Dean of Student Services at [www.alaska.edu/hof/](http://www.alaska.edu/hof/) or refer to the student handbook that is

**10. Course Calendar** (subject to change)

**Principles of Metabolism and Biochemistry**

**Biology 303 Fall 2012**

**Section I. *C elegans* a model for biological research**

1. Sept. 5 Class introduction
2. Sept. 12 *C elegans* biology
3. Sept. 19 Trends in *C elegans* research

Ecology of *Caenorhabditis* species, Kiontke et al 14pp

Intermediary metabolism, Braeckman et al 24pp

Three recent reviews will be selected and pdfs posted on Blackboard

**Section II. Metabolism and Biochemistry of Biomolecules**

## Capstone Project in Biological Sciences

The intent of the Biological Sciences capstone project is to integrate a range of knowledge and skills learned in previous courses, including scientific knowledge, quantitative literacy, and communication skills, and to apply these products of the university education to a creative activity. For a biologist, a fundamental expression of applied knowledge, creativity, and

critical reasoning is to engage in scientific inquiry.

# Rubric for Undergraduate Research in Metabolism and Biochemistry Capstone Project

## Final Evaluation of Capstone Project by Course Instructors (=Research Supervisor)

*To be completed by student*

Student's name \_\_\_\_\_ Date \_\_\_\_\_

Capstone Project Title \_\_\_\_\_  
\_\_\_\_\_

Research Supervisor \_\_\_\_\_

*To be completed by Research Supervisor*

	Yes (excellent)	Somewhat (adequate)	No (inadequate)
1. Does the capstone paper represent the student's own scientific research?			
2. Does the capstone paper make a compelling argument for the significance of the student's research within the context of the current literature?			
3. Does the capstone paper clearly articulate the student's research goals?			
4. Are the methods appropriate given the student's research agenda?			
5. Is the data analysis appropriate and accurate?			
6. Does the thesis skillfully interpret the results?
